The second generation of *Scopula imitaria* (Hübner) (Lep.: Geometridae)

Further to B.K. West's note (*Ent. Rec.* 102: 109) on occasional bivoltinism in this species, it may be of interest to note the occurrence of a single example in my garden m.v. trap on 7th September 1989. The specimen is markedly smaller and darker than the normal form.— I.V. BEAVIS, 104 St James' Road, Tunbridge Wells, Kent TN1 2HH.
